#### Education

B.A. and Grad. Dip  
University of Sydney

+1 201 856 9364

[adam.peckman@aon.com](mailto:adam.peckman@aon.com)

#### Responsibilities

Adam is the Global Practice Leader for Aon's Cyber Risk Consulting practice, and the Head of Cyber Solutions for the Asia Pacific region.

The Cyber Risk Consulting practice is a global cyber data and analytics team; helping clients model their cyber loss exposure to optimize security investments and insurance strategy by leveraging best-in-breed cyber risk quantification methodologies.

In this role, as the leader of the APAC Cyber Solutions business he leads up all security advisory, testing, risk consulting, cyber insurance broking, and digital forensics and incident response capabilities.

#### Experience

Prior to joining Aon in 2012, Adam served as a Principal Consultant at an APAC Risk Management and Security firm that was headquartered in Australia.

His extensive industry experience has involved numerous Security Risk and Enterprise Risk advisory projects that include enterprise wide security assessments and advanced quantitative simulations to model financial exposures from cyber risk. He first began working in the industry in 2005.

#### Expertise

Adam's expertise includes corporate governance, enterprise risk management, cyber risk assessment, cyber quantification & financing, capital and return-on-security investment modelling, and insurance strategy.

Adam has two patents that cover cyber security risk assessments and modelling methodologies.

#### Education

Adam earned a B.A. and Grad. Dip. from the University of Sydney.

Adam is a Governance Risk Compliance Certified Professional (GRCP), and a Cyber Professional Liability Practitioner (CPLP).

He has certified security training in ISACA (CRISC), ISO 28000: Supply Chain Security, and SEI-CERT (OCTAVE).

He is a Member of the Ibec (Irish Business and Employers Confederation) Digital Economy Committee.

**About:** Aon's Cyber Solutions offers holistic cyber security, risk and insurance management, investigative skills, and proprietary technologies to help clients uncover and quantify cyber risks, protect critical assets, and recover from cyber incidents.
